REJUVENATING CLEANSE

To help you prep clients for an **Intraceuticals Rejuvenate** treatment, Intraceuticals has released **Exfoliant** and **Gentle Cleanser**. Specifically formulated to help maintain balanced hydration, Intraceuticals Gentle Cleanser combines pure botanical extracts to soothe and calm sensitive, dry or dehydrated skin. The gentle formulation removes makeup, excess oils, and impurities without stripping natural emollients and oils. The Intraceuticals Exfoliant is ideal for prematurely ageing skin, helping to diminish the appearance of wrinkles, ensuring that makeup glides on smoothly. Also new from Intraceuticals, the three-step hyaluronic layering homecare system is now available in a handy pack. INTRACEUTICALS.COM.AU. 1300 725 660
